1. To start

"Image compare Viewer" add-in allows you to compare two images by dragging a separator between them. This add-in allows you to input the URL of two images in JPG, PNG, GIF or SVG format, add a label and descriptive text for each one. It is possible to configure the initial position of the separator, the color of the separator and the aspect ratio of the images. This add-in is available for all column design, if it is a single column it is allowed to select a size from the comparison box. This solution is available to be used on a 'Webpart' section of a SharePoint page, on a page with a 'Full-page' layout of SharePoint or on a tab (TeamsTab) of Microsoft Teams.

IMPORTANT

To start with this trial license (30 days) you must use an "**Administrator tenant user**" or a "**Site Collections Administrator**" because the add-in needs to be registered. After installing, you must add this webpart on any page using this type of administrator user. After it is registered, any other user could use this add-in.

If you need to remove "cache" to renew license, use this querystring "?enetRemoveRegkeyImgCompare=true" on any page where the component is added.

Example:

https://contoso.sharepoint.com/sites/mysite/SitePages/page.aspx?**enetRemoveRegkeyImgCompare**=true

2. Showcase 1: minimum settings

“Image compare” viewer using minimum settings. Only set 2 images (Before and After) shared from website, ratio 1:1 and small size because one column layout
