1. To start

The “Scroll images" add-in brings your content to life with animated images and dynamic, multi-line text inside horizontally scrolling boxes. You can showcase images along with an optional title and content, either from a static collection or directly from a site list. Each image box can sport a different background color, making your display pop! This add-in presents information in an eye-catching scroll box complete with an image, title, creatively designed multi-line text, highlighted content, and a link to enhance the value. Customize the image size, choose between two layout options, set the CTA label, and control the direction and speed of the scrolling. With options to pause or restart the animation on mouse hover, you have total control over the user experience. This add-in fits perfectly within "full width" columns and all other column structures. When pulling data from a site list, you can select from lists, libraries, events, or pages and pick custom field.

IMPORTANT

To start with this trial license (30 days) you must use an “**Administrator tenant user**” or a “**Site Collections Administrator**” because the add-in needs to be registered. After installing, you must add this webpart on any page using this type of administrator user. After it is registered, any other user could use this add-in. If you need to remove “cache” to renew license, use this querystring “?enetRemoveRegkeyTickerImages=true” on any page where the component is added.

Example:
https://contoso.sharepoint.com/sites/mysite/SitePages/page.aspx?**enetRemoveRegkeyTickerImages**=true

2. Showcase 1: From collection data

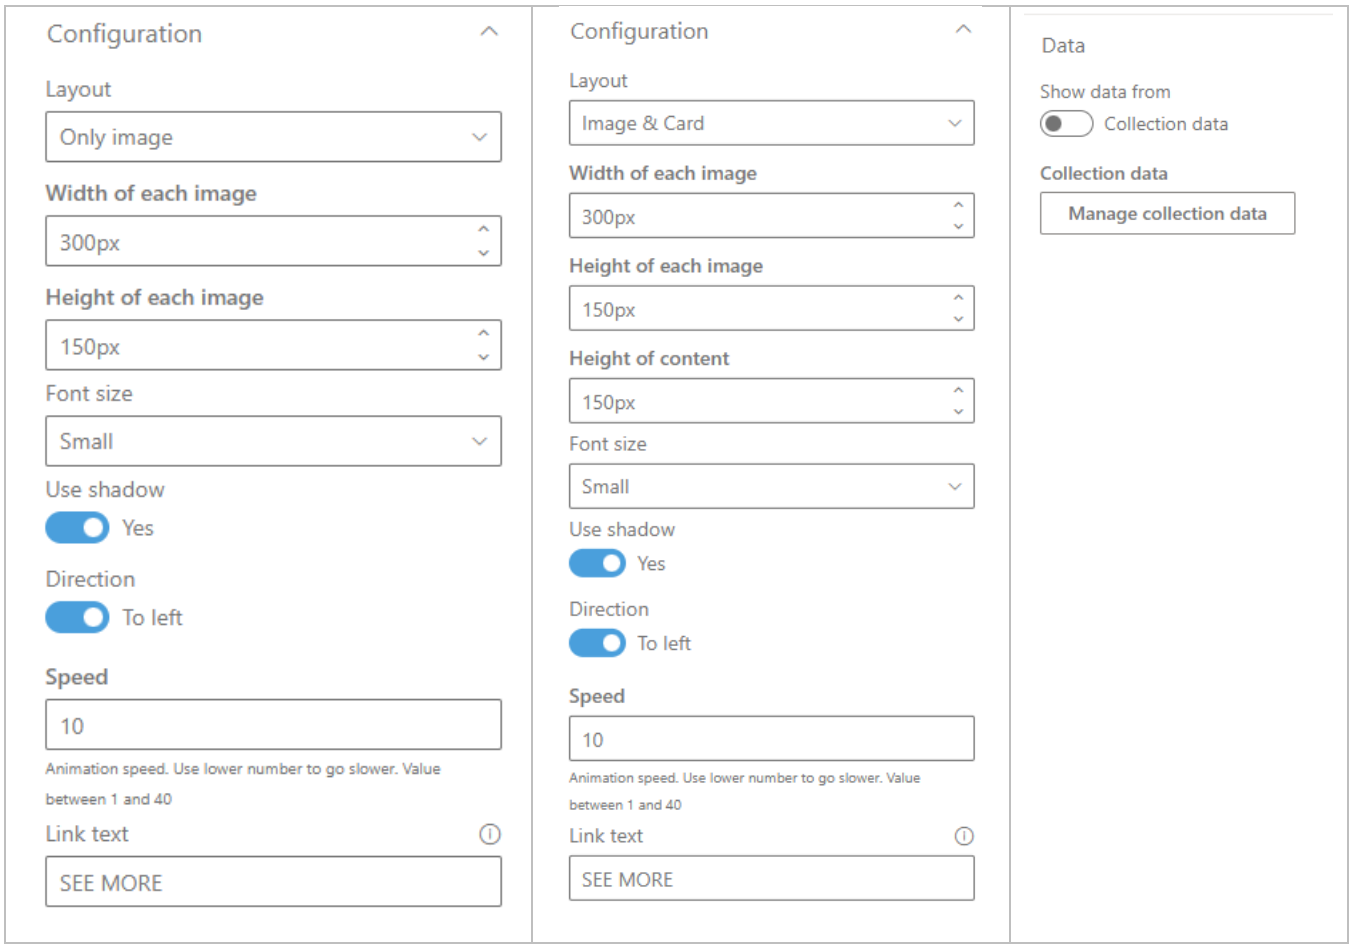

“Scroll images” viewer using static settings from a collection data and some content with “marked” code

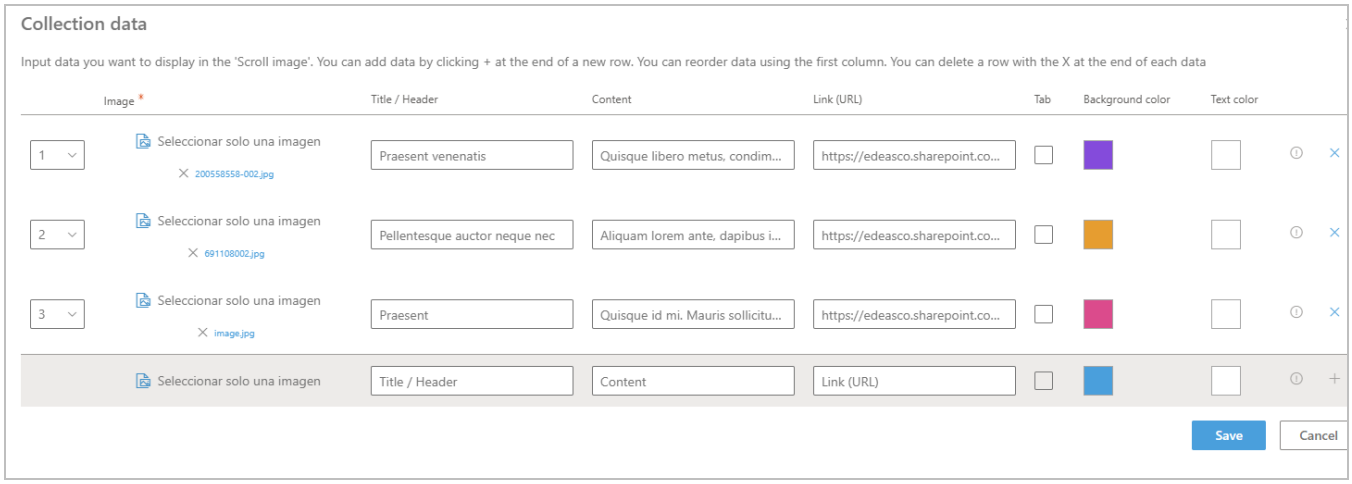

LAYOUT: ONLY IMAGE

LAYOUT: IMAGE & CARD

“Marked” code:

Use **_text_** to italics fonts

Use ****text**** to bold fonts

Use **{ color: HEX or Name} { text }** to change font color

Example:

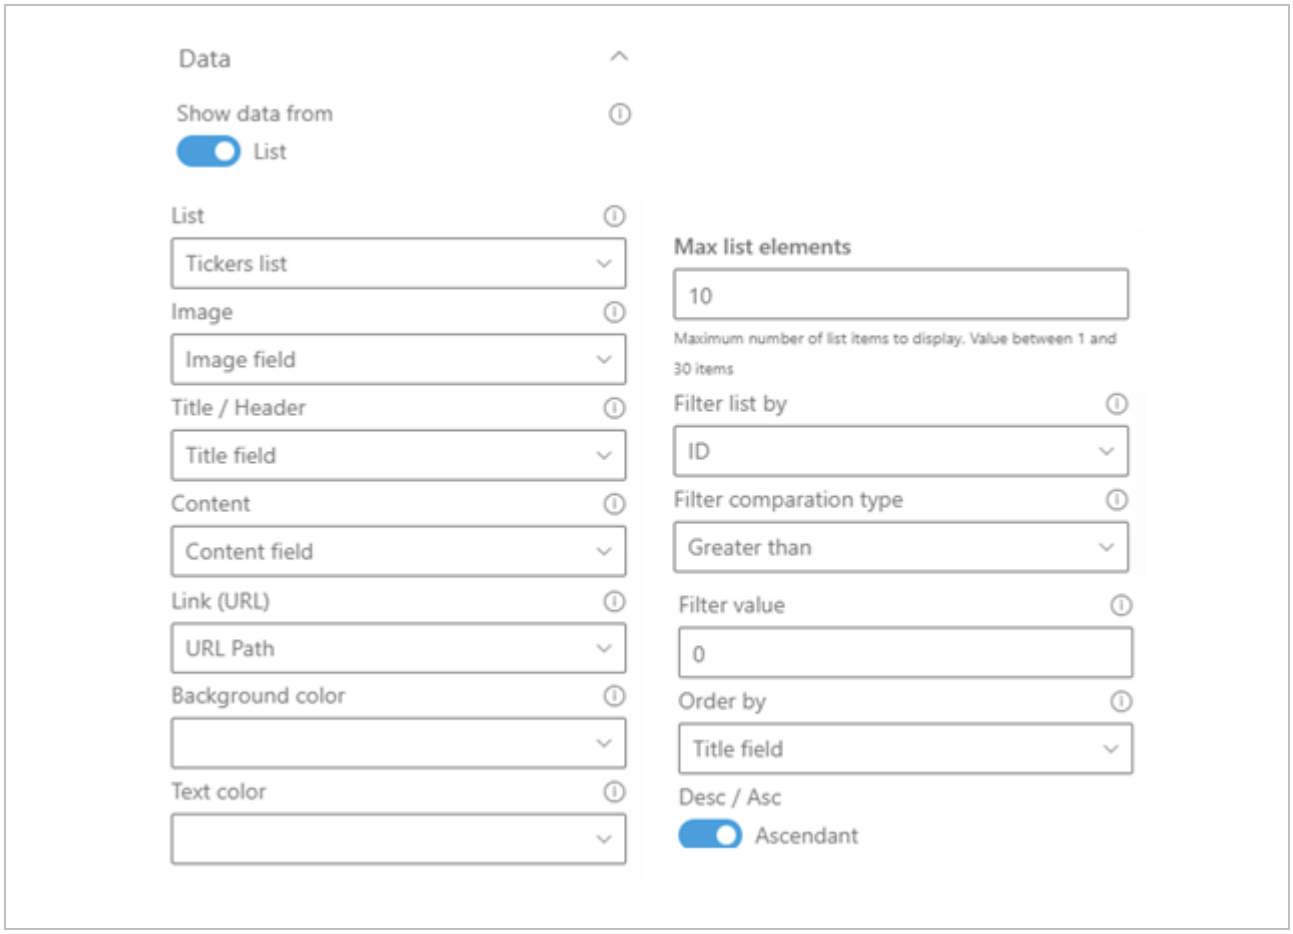

Pos 1 ➔ Cras sagittis. _Donec id_ justo. **Quisque malesuada** placerat nisl. Nulla porta dolor. {color:darkred}{Ut non enim} - {color:#0000ff}{eleifend felis pretium}

3. Showcase 2: From list data using image field

“Scroll images” viewer using data from a items list. Demo List “Ticker list” using fields and optional filter. This list has mandatory image field

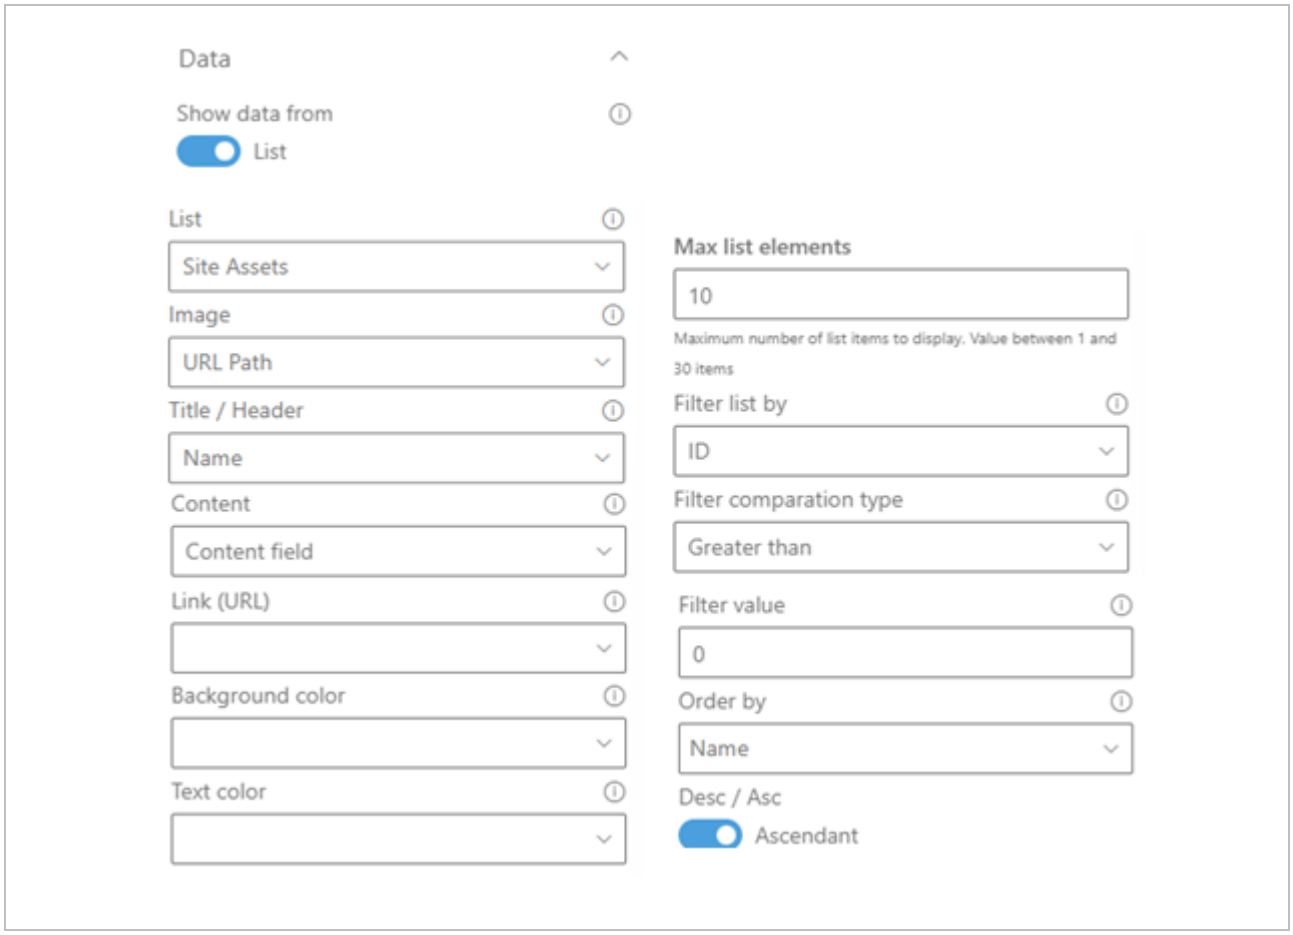

This list could fill it using “Power Automate” and getting data from any “Web service” or database and complete with calculated field or input field on: Background and text color. Market code is available on content field

4. Showcase 3: From list data using image library

“Scroll images” viewer using data from a items list. Demo Library “Site Assets” using fields and optional filter

This list could fill it using “Power Automate” and getting data from any “Web service” or database and complete with calculated field or input field on: Background and text color. Market code is available on content field

5. Showcase 4: From Events or ‘SitePages’ list data

“Scroll images” viewer using data from any list or library. Demo List “Events” using fields and optional filter.

7. Differences between this add-in and 'Ticker' and 'Moving or infinitive cards'

There are some differences between "Scroll images", "Moving or infinitive cards" and "Ticker" add-in: on **target**, **layouts** and **properties**. Let's see them

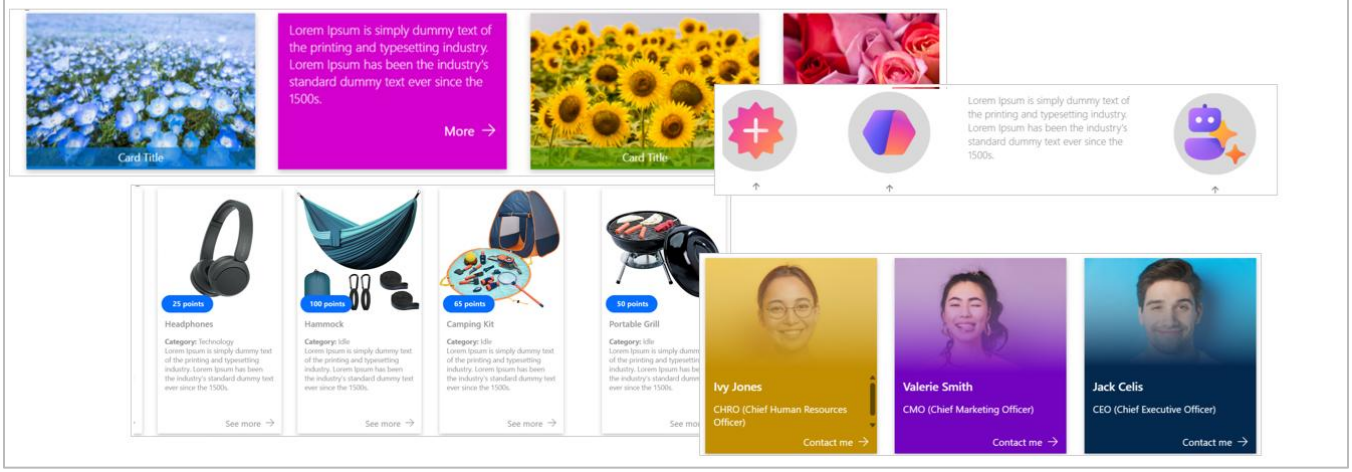

ON TARGET

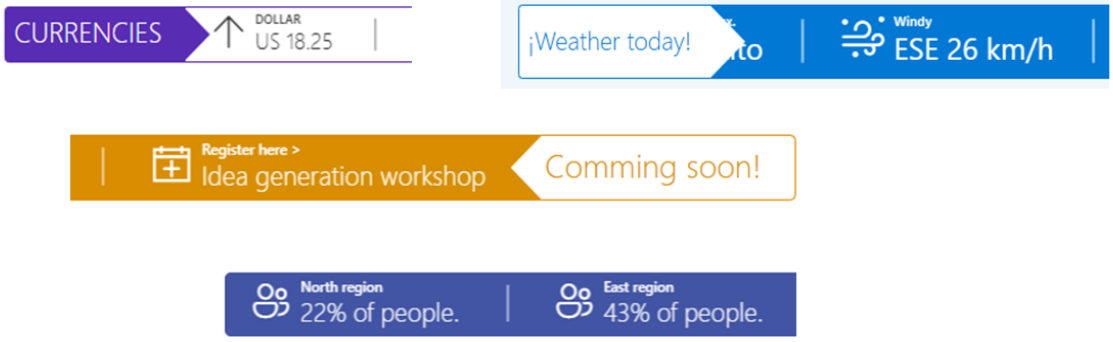

On target

'Scroll images' component is customizable group of images that move infinitely in a loop. Each image could have title and multi-line large content to describe de image. There're 2 types of layout: Only image or Image & Card. Image is mandatory, title and content are optional

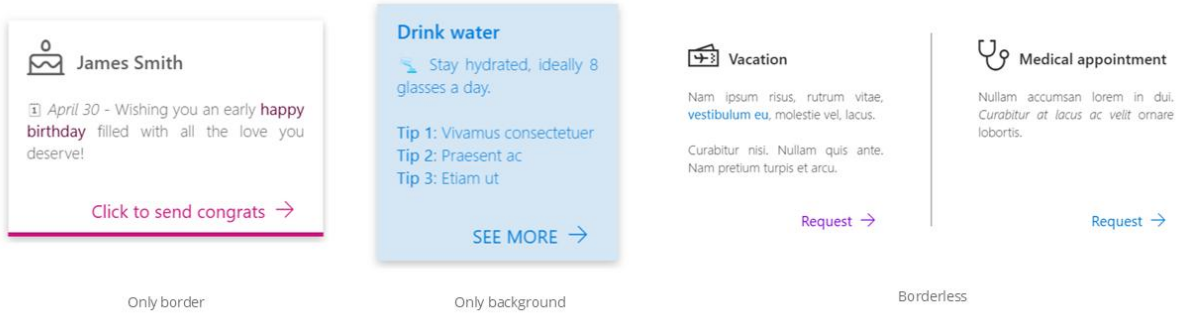

ON LAYOUTS

On layouts (style designs)
'Tickers' component not has layouts; it has a negative or positive one color on background and one main label

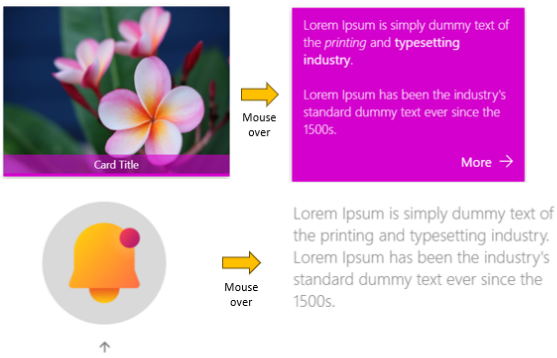

On layouts (style designs)
'Moving cards' has 3 types of CARDS layouts, customizable 'Call to Action' and multi-line content using 'Marked' code to italics, bold and links. Width and height of cards are customizable. Icon size is adjustable

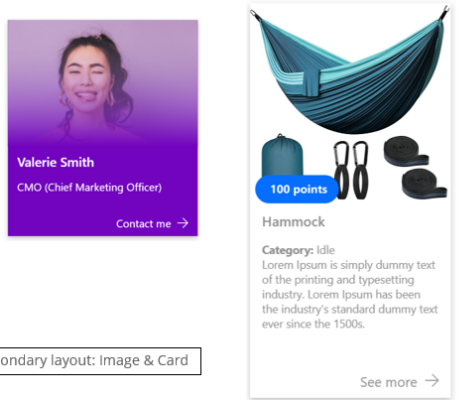

Only border | Only background | Borderless

On layouts (style designs)
'Scroll images' has 2 types of IMAGE layouts. "Only image" has title over image and it has a "mouseover" effect to show a multi-line content. Width and height of images are customizable. On "Image & Card" you can set content height

Main layout: Only image

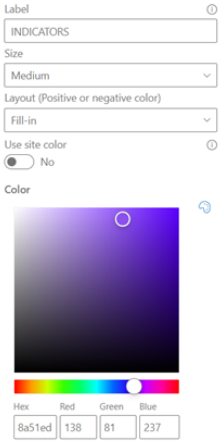

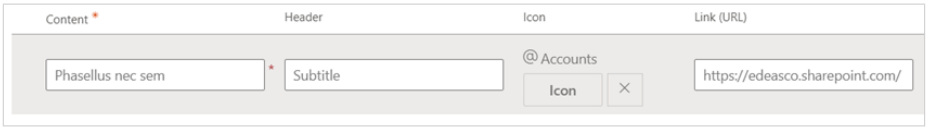

Secondary layout: Image & Card

ON PROPERTIES

On properties

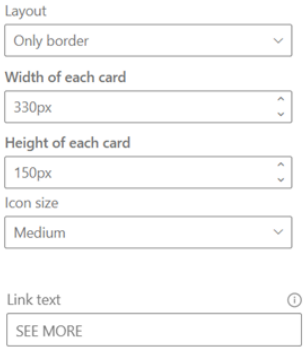

'Tickers' props are focus on positive or negative background color and main label. On data collection it needs plain single-line text, icon and header not mandatory

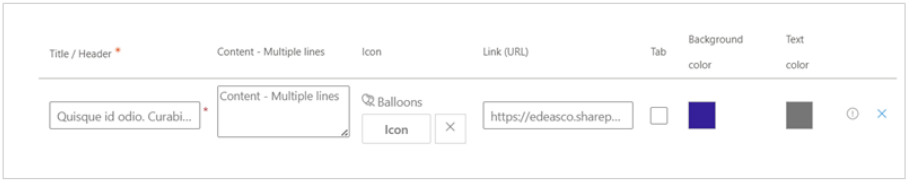

On properties

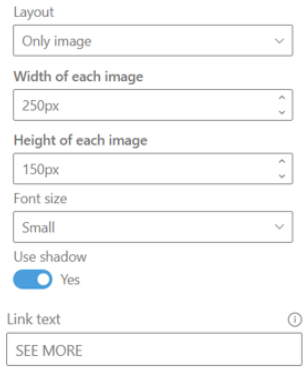

'Moving cards' props are focus on 3 types of card (layouts), variable size using a custom width (large as 550px) and height (large as 500px) **cards**, CTA, Icon size. On data collection it needs header, icon and full multi-line content using 'Marked' code to italics, bold and links. Each card has its own background and text color depends on layouts.

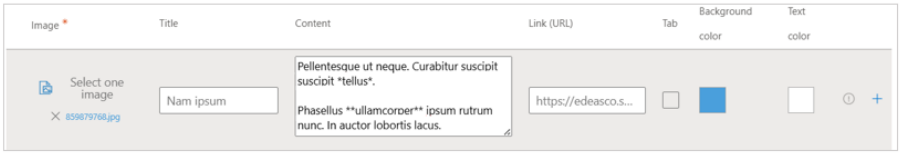

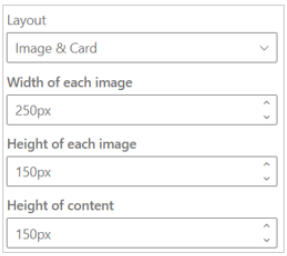

On properties

'Scroll images' props are focus on 2 types of image look & feel (layouts), **image** size (width and height), CTA, Shadow toggle and font size. On data collection, image is mandatory, and you could add title and multi-line content. Each image has its own look & feel on background and text color. On "Image & Card" you must define height of content

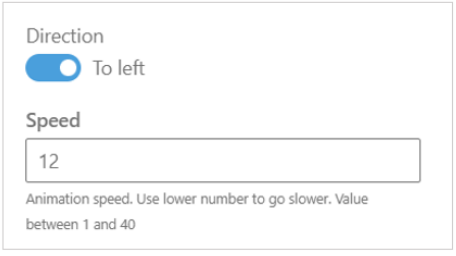

WHAT THOSE ADD-INS SHARE

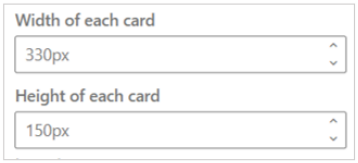

All add-ins

Share

- Scroll effect
- Direction: To left or To Right
- Speed: animation scroll effect

Moving cards
